SUMMARY

Software Development Intern at Blessing Softtech, focused on application security for an AI voice agent platform. Previously 16 months at 0xCommit as a Python & Blockchain intern, building backend modules and auditing Solidity smart contracts. B.Tech IT (2025), with a focus on Python, AI agents and Web3 security.

EXPERIENCE

Blessing Softtech — Delhi, India (Remote)
Software Development Intern — *Oct 2026 – Present*

- Perform security reviews of Fonazo, an AI voice agent platform, identifying vulnerabilities across its codebase.
- Document each vulnerability with a severity rating, a reproducible test case and a recommended fix.
- Remediate security issues through GitHub pull requests, validated in Dockerised local environments.
- Write technical documentation for each security fix and keep docstrings current with every code change.

0xCommit — Dubai, UAE (Remote)
Python & Blockchain Developer Intern — *Dec 2023 – April 2025*

- Developed object-oriented Python backend modules for an AI platform that audits and tests smart contracts.
- Integrated third-party REST APIs and wrote SQL queries for data access; debugged and tested Python services.
- Audited Solidity smart contracts for 13+ client companies, identifying logic and security vulnerabilities.
- Tested contracts using Foundry and prepared audit reports for each engagement.
- Implemented IPFS-based decentralised storage for a file-sharing prototype.

PROJECTS

Zoro | *Python, Anthropic Claude SDK, SQLite, Playwright*

- Built a framework-free personal AI agent in Python that plans and executes multi-step tasks via chat.
- Designed a layered architecture (reasoning, memory, tools, scheduling) on the Claude SDK with SQLite memory.
- Sandboxed shell, file and Playwright tools behind user approval, with a real-time chat dashboard.

BlockShare | *Blockchain, IPFS, Solidity, React, Node.js*

- Built a decentralised file-sharing application on IPFS, removing reliance on a central server.
- Developed and deployed Solidity smart contracts for access control and on-chain file integrity checks.

VeloRent | *Python, Django, JS, Docker*

- Developed a Django bike-rental platform with user authentication, bike listings and rental tracking.
- Integrated the Stripe API for secure online payments.
- Built an admin dashboard to manage bike availability, rentals and payments.

SKILLS

Languages: Python, Solidity, JavaScript, SQL, HTML/CSS
Frameworks: Django, Flask, React, Node.js
Blockchain & Security: Foundry, Hardhat, Remix IDE, IPFS, Smart Contract Auditing, Secure Code Review
Developer Tools: Git, GitHub, Docker, Linux, Linear, VS Code, IntelliJ, Zed
AI: Anthropic Claude SDK, OpenAI Codex, GitHub Copilot, AI Agents, RAG, n8n
Soft Skills: Analytical Thinking, Problem Solving, Planning, Collaboration
Currently Learning: LangChain, LangGraph, Agentic AI

CERTIFICATIONS

0xCommit Bootcamp — **2023**: Certification Number: 02
Udemy JavaScript Course — **2023**: Certification Number: UC-1e89766b-8604-4365-9ff0-00568a6f54b0
IRJMETS Research Paper — **2024**: DOI: https://www.doi.org/10.56726/IRJMETS63720

EDUCATION

Guru Gobind Singh Indraprastha University — Delhi, India
Bachelor of Technology in Information Technology — *CGPA: 8.36 | 2021 – 2025*

Apex Public School — Delhi, India
Class XII — *79.33% | 2021*

Apex Public School — Delhi, India
Class X — *74.5% | 2019*
